

## *I wish to be an intern at Rooster Teeth*

**Nathaniel, 16**  
**leukemia**

Nathaniel's medical journey began when he noticed swelling in his eye which lead to a leukemia diagnosis. A rare form of leukemia that occurs in less than one percent of the population. Nathaniel immediately began chemotherapy and hospital stays lasting months at a time. Through it all, he remained optimistic for the future ahead.

Nathaniel is a fan of *Harry Potter*, "The Flash," basketball and football. He enjoys studying math, playing Minecraft and spending time with his dog, Mocha, and cat, Smudge.

When dreaming about his wish, Nathaniel considered wishing to swim with sharks, have a new game system or get a puppy. However, one wish stood out above the others to Nathaniel, and he decided to wish to be an intern at Rooster Teeth, and online comedy and gaming community. During his very long hospital stays, Nathaniel frequently passed the time watching Rooster Teeth videos. He says that they always make him laugh, and he would love the chance to gain some behind the scenes knowledge and video spoilers. According to Nathaniel, "the Internet is the future," and he hopes for the chance to be a part of it!
