PEDIATRIC DENTAL CARE

I wish to build a gaming computer

Matteo, 15
kidney condition

At the young age of 15, Matteo has had a long journey dealing with difficulties when his first kidney graft was rejected. Nevertheless, he's continued to keep a positive attitude during the transmission period of his new transplant. Due to the nature of his condition, he continues to attend treatments and regular follow up with his doctors.

Matteo has always been an active kid with a plethora of interests. He loves playing baseball, competing in video games, and swimming with his friends and family. On weekends, Matteo loves to play outside with his dog, Bruiser. However, a lot of his favorite hobbies had to come to a halt when his illness began. Not being able to engage in all the activities that he used to was hard on Matteo, but there was one thing that he happily continued: video gaming.

Being a competitive gamer, Matteo wished to create his own PC that would be perfect for gaming. His wish provided him the opportunity to upgrade his rig, including getting a high-end gaming keyboard and mouse. With his flawlessly-designed computer, Matteo can continue learning programming and have an amazing gaming experience at the same time. This wish will enable Matteo to continue having fun and creating memories with his family and friends through something he loves.
