

Get ready to capture the incredible moments of your child's wish. From fun planning visits with volunteers, to the wish experience itself, your child's journey will be one to be remembered and shared. We'd like to share those moments too!

Here are some tips and tricks to help you take the best photos and videos possible of you and your child's wish experience:

1. Always take photos/videos **horizontally**. Vertical up-and-down photos are great for things like Instagram stories and Snapchat, but horizontal images are more versatile.

2. Make sure your images are in focus. **Tap the screen on who/what you want to focus, on and your phone will focus automatically.**

3. Don't be afraid to **use flash** if the lighting isn't great – shadows can ruin a great shot. When in doubt, try one photo with flash and one without to see what works best!

4. Always make sure the light (sunlight or indoor light) is in front of the person you're taking a photo of. Taking a photo with the light behind them will make them look dark.

5. Get **close-ups** – we want to see how much fun your child is having on the wish! Try to get closer to them, instead of zooming in (if possible), to make sure you get the highest quality photo.

6. Take a **variety** of photos
