MEET NOAH

Noah, now 17, was born with a rare condition that causes congenital anomalies along his core. In his young life, Noah has had 32 surgeries, involving his heart, lungs, spine, trachea, esophagus, bowel, and bladder. His complex health issues mean that he has a large healthcare team, frequent hospital visits and procedures, and a great deal of coordination between his family and his team of medical professionals.

As he was diagnosed at birth, Noah's situation is the only "normal" his family knows for him, so when the idea of a wish first came up, Noah's mom Amy wasn't sure that it was right for them. She also felt that as a family who had gotten to experience things like traveling together, they did not want to take the opportunity from another family who may need it more.

Noah's Wish Coordinator explained that **our vision is to grant this wish of every eligible child**, so they would not be taking the experience from another family. She also shared something that resonated with Amy – **this is not a trip, it's a wish**, and those are very different things.

Noah's wish, inspired by his love during treatment of the 1970s TV show *Emergency!*, was to visit Los Angeles and meet members of the LAPD and LAFD. His unforgettable wish experience involved meeting these heroes, participating in a mock high-speed chase, riding in an LAPD helicopter, being sworn in as an honorary firefighter, going through training exercises, piloting a fire boat, and responding to emergency calls.

As epic as all of that was, Amy says the true value of Noah's wish came from understanding the overwhelming community of supporters who came together to make it happen. "That profound sense of community is so significant and lasting," says Amy. "It continues to carry us through."
